

CORNER HISTORY:

CORNER FILE CODE: T6S-R9W-E-09

ORIGINAL USPLS SURVEY: Corner established by Jacob Fowler, Dec. 23, 1805 "Post"  
COUNTY SURVEYOR'S BOOKS: Book 1 P. 302: O.B.Pasco WCS

March 15, 1874 (Monument not identified). Book 3 P. 236: C. Warren

Abbott Dep. WCS Mar. 14, 1918 "Old Established Corner was located".

OTHER SURVEYS AND PLATS: "Stone" called on "Corner Code

System" card, no references.

VERIFICATION OF CORNER POSITION: May 2003; the limestone shown was found in place. Its position is reasonably consistent with 1947 plans for Vectren's Y-56 transmission line, which show the proposed power pole location to be 1' south of a "Stone Pile" marking the corner. Ties to other features shown on the 1947 plans within an area 1 mile westerly and 1 mile easterly of this corner indicated the existing poles are generally very close to their plan locations.
